# 25 Full or reduced-size copies per minute on plain paper.

## Reduction

This advanced feature quickly begins to pay its own way. And not just by helping to reduce mailing and filing costs. Press clippings, print outs and other over-sized documents can be quickly copied at about half their original size making it easy to incorporate them in reports, presentations, etc. To operate, just press the reduction key before starting a copy run. Copies come out crisp, clear and a lot more manageable in size.

## Quick

At a rate of 25 copies per minute, the BD-7511 gives the kind of efficiency you'd expect only from a much larger copier. Within 5 seconds of pressing the print button your first, clear, crisp and dry copy is in the exit tray. TOSHIBA makes no compromise.

## Easy

Get from 1 to 99 copies simply at the touch of a button. No dials to twist, everything at your fingertips. There's even a bright quantity display that lets you check the count before starting the copy operation. And the copies – clear and clean, ready to write on, staple or fold. For greater convenience, there's an interrupt key to let you make a few copies of a different original during a long copy run. And with the BD-7511's fixed platen design, you get all this without sacrificing a great deal of office space.

## Efficient

To keep operating costs to a minimum, there's an automatic toner recycling system in the BD 7511 which returns excess toner from the selenium drum to the toner supply.

Desk is not included

## Automatic

The BD-7511 is microprocessor controlled. This highly efficient system gives automatic control to many of the most important functions.

Toner supply is constantly monitored and adjusted to maintain perfect copy quality. Warning lamps light to indicate the need to replenish toner or paper supply. Another lamp gives visual warning of a paper misfeed. And when the exposure control is adjusted to copy a light or dark original it automatically resets to normal after 30 seconds.

## Consistent

Copy after copy, the BD-7511 delivers copies that are faithful to the original. Automatically.

## Convenient

Load the BD-7511 with two sizes of paper, up to about 300 sheets of each. At the touch of a button, the copier automatically uses the specified size, with a visual indication of the size being used. Load a different paper cassette into the copier and the indicator lamp automatically indicates the change. Available cassette and paper sizes range from a maximum 11x17" or ledger to a minimum 5½ x 8½" or statement size.

## Flexible

Since originals are often book or magazine pages the hard cover and stationary platen make it easy to copy from these documents.

# TOSHIBA PLAIN PAPER COPIER BD-7511

## Specifications:

Copying process	Indirect transfer electrostatic method (Dry process)
Type	Desk-top
Available original	Sheet, book and three-dimensional object
Available copy paper	Maximum size – A3 (297 x 420 mm) or 11 x 17" Minimum size – A5 (210 x 148 mm) or 5½ x 8½"
Available cassette	Ledger, Letter and Legal Optional; A3, A4, A4-R A5, B4, B5, B5-R, Statement
Paper supply	Dual cassette; automatic feed from paper cassette
Copying speed	25 copies per minute (Letter)
Magnification ratio	1:1, 1:0.65
Warm-up time	Less than 3 min.
Multiple copying	1 to 99 copies
Controls	10-button keyboard for multiple copies; print button, power switch, copy density control button
Counter	6-digit total counter (Non-resettable)
Power supply	AC 115 Volt, 60 Hz
Power consumption	AC 115 Volt, 12 A
* Power supply and consumption are different for different countries.	
Dimensions (W x H x D)	860 x 580 x 440 mm (33⅞ x 22¹³⁄₁₆ x 16¹⁵⁄₁₈")
Weight	113 kg (249 lbs.)

It is recommended that only supplies made or designated by TOSHIBA be used for this machine in order to get optimum results.
